Diagram to include land, buildings, other utilities, and specifics of pipeline installation.

Due to the nature of installing natural gas lines, it is inevitable that ground disturbance will occur. It is realized that the property may not be returned to its original state of groomed conditions because of compaction. It is the Lac La Biche District Natural Gas Co-op Ltd.'s policy, in most cases, to allow settling of the roach through the winter and spring, and then return for final backfilling.

The landowner, the undersigned, does hereby provide consent to Lac La Biche District Natural Gas Co-op Ltd. to align their gas pipeline on the above noted property.
